

I would like to urge you to reject NAB's petition 04-160. I have been an XM customer since its inception and would like to be able to get traffic and weather too. In my area, Western Loudoun County, Va., the reception on "normal" radio is bad at best. Further-it is about time that lawmakers start making laws that benefit the people that elect them and not the ones that fill their pockets. This bill helps no one but the Broadcasters!Stop!  
Thank you for your time.
